## Art Rejections:

1. The text of 35 USC 103(a) not cited here can be found in previous office action.

2. Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ng et al, U.S. pat. No. 6,131,096.

Per claims 1 and 7-14, Ng teaches a method for configuring a client (second) device to perform data synchronization with a server (first) device comprising:

- a) transmitting from the first server device to the second client device, via a communication connection, instructions for generating a web-based interface on the second device, e.g., web browser applets, plug-ins, etc., (see col 4, lines 20-43), the user interface being programmed to elicit from a user at the second device information identifying a personal information manager (PIM) used on the second device (col 6, lines 6-11, 29-37), and to transmit the information to the first device via the communication connection (see col 6, lines 65-67);
- **b)** providing to the second device via the communication connection a synchronization package including a synchronization application (col 6, lines 6-11), the synchronization application being installed on the second device by the web-based interface (col 8, lines 3-6), the web-based interface also being

Art Unit: 2454

programmed to elicit from the user synchronization information regarding data to be synchronized, and to provide the synchronization information to the synchronization application installed on the second device (see col 8, lines 6-19).

 $\underline{\mathrm{Ng}}$  does not explicitly teach that the same web-based interface would be used at the first server device.  $\underline{\mathrm{Ng}}$  however clearly teaches that the first server device comprises a web server for exchanging data with the client using a conventional web-based interface (see col 3, lines 65-67 and col 4, lines 51-53).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the same web-based interface at both server and client because it would have ensured proper data exchanged between server and client (see col 4, lines 51-53 and col 7, lines 50-62).

Per claims 2-6,  $\underline{\text{Ng}}$ 's teachings encompass all claim limitations (see col 3, lines 52 - col 4, line 19).

Per claim 15,  $\underline{\text{Ng}}$  teaches that the devices can communicate with each other wirelessly (see col 10, lines 26-27).

Claims 16--36 are similar in scope as that of claims 1--15 and hence are rejected for the same rationale set forth for claims 1--15.

Application/Control Number: 10/700,083

## Response to Arguments:

3. Applicant's arguments filed on March 4, 2010 with respect to claims 1-36 have been fully considered but they are not deemed persuasive.

Applicant alleges that  $\underline{\text{Ng}}$  fails to disclose the claimed invention because  $\underline{\text{Ng}}$  does not teach that a web-based interface is used at the global server 105.

The examiner disagrees. Ng clearly teaches using a web server (140) to communicate with the client device where the web server is part of the global server 105 (see col 4, lines 33-34). Since Ng teaches using a web-based interface at the first device, i.e., web server 140, the examiner submits that Ng's teachings meet the claim limitations.

## Conclusion:

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 571-272-3977. The examiner can normally be reached on Monday through Friday from 7:00am to 4:00pm. The Group general information number is 571-272-2100. The Group fax number is 571-273-8300. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn, can be reached on 571-272-1915.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
